ACCESS

LOW CLEARANCE RV

SCAN FOR VIDEO TOUR

The Access RV is a compact, versatile vehicle built for maximum freedom on the road. Its low-profile chassis allows it to fit under drive-throughs, parking garages, and even some home garages, saving on storage costs. With innovative features like a stowable bed, expanded cabin space, and four-season plumbing, the Access is perfect for year-round travel. Despite its size, it includes all the essentials of a larger RV, such as a queen-size bed, kitchen, bathroom, TV, and climate control, powered by a generator and house batteries.

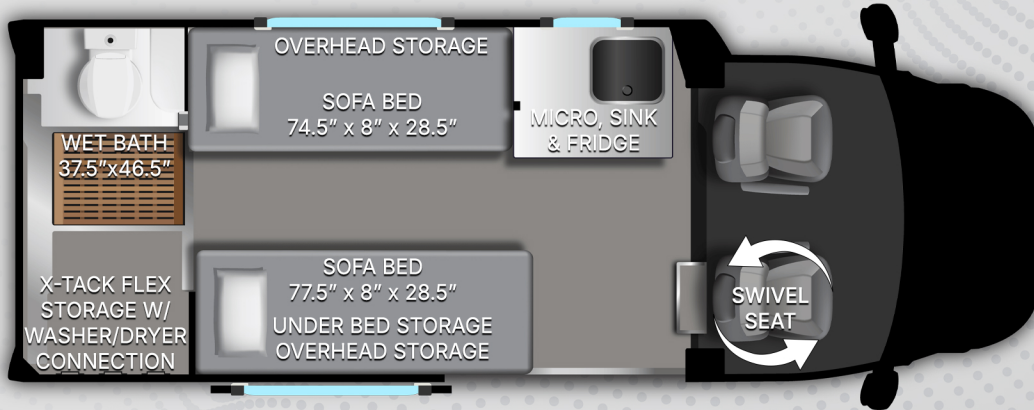

Easy to service, the Access uses non-proprietary, off-the-shelf parts, and features simple wiring to avoid long repair delays. Unique elements like a cabin expansion and standing room basin add extra space and functionality, making the Access a practical and flexible choice for travelers looking to explore more with fewer limitations.

ROUTE

FLEX STORAGE

SCAN FOR
VIDEO TOUR

The MAXVAN Route is a unique RV built with durability and space in mind, featuring an 8-inch cabin expansion on the driver's side for extra living area. Powered by a 3.6L Pentastar® V6 engine and a TorqueFlite® nine-speed automatic transmission, it can handle heavy loads with a 6,910-pound towing capacity. The modern interior includes a large info-tainment screen offering wireless smartphone connectivity and comfort controls.

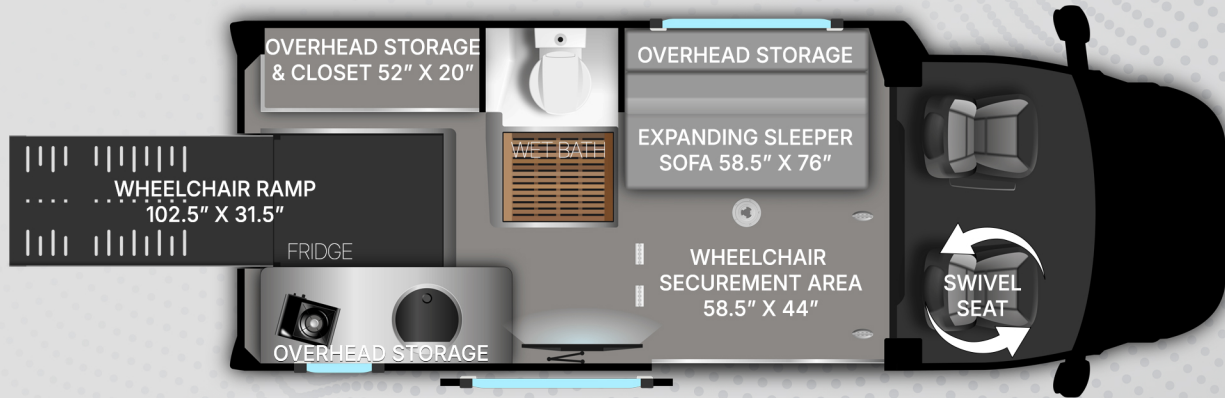

Inside, the MAXVAN Route is designed for comfort and functionality. Twin sofa-beds with layered foam provide ample seating and sleeping space, while under-bed storage, an XL kitchen drawer, and a stow-away sink maximize space and convenience. The wet bath features a cassette-style toilet, and a teak wood shower grate. With overhead storage, flexible cargo areas, and a privacy door separating the bath from the living space, the MAXVAN Route is built for both style and practicality, making it ideal for adventurous travelers.

PATHWAY

WHEELCHAIR ACCESSIBLE

The Maxvan Pathway was created to offer a spacious and accessible RV solution for families with wheelchair users. Built on the Ram ProMaster 3500 chassis, it features a low rear floor, increased headroom, and a patented rear ramp system that allows wheelchair users to easily roll into the van without hydraulic lifts. Inside, the electrically adjustable rear floor provides a flat surface when needed, while the interior showcases European-inspired materials for a sophisticated, functional travel experience.

Equipped with premium features like a sliding couch that converts to a near-queen-sized bed, a wet bath, 12V refrigerator, and a Onan 2800i QG Generator, the Maxvan Pathway offers both comfort and convenience. Featuring a secure wheelchair tie-down platform, accessibility can be upgraded to include an overhead trolley system for lifting passengers. Since its launch in 2020, the Maxvan Pathway has become a popular, high-quality, custom-built solution for accessible RV travel.
